Are you up-to-date with the new EU Food Hygiene Legislation?

Everyone understands that in the food industry - from the smallest kitchen to the largest factory - the highest standards of hygiene are essential.

In an effort to protect both your business and your customers, the EU revised its Food Hygiene Legislation which came into effect in January 2006.

The new legislation includes Regulation 852/2004/EC, covering the hygiene of foodstuffs, and Regulation 853/2004/EC, which lays down specific hygiene rules for food and animal origin.

The new rules impact on workwear and hand hygiene, so how can you ensure your workforce is compliant?
